- \* 13 AH refers to 13 AMP capable output / active high digital input  
04 AH refers to 4 AMP capable output / active high digital input  
02 AH refers to 2 AMP capable output / active high digital input
- \* Digital inputs must be supplied from their own box, not from an external supply
- \* Pins 14, 15, 24 & 25 are 0-10V analog in or active high / active Low digital inputs. These could be driven by an externally supplied device. Pin 14 can also be factory configured as 4-20mA input. Pin 15 can be programmed to export a 10 Volt reference for use with a potentiometer of 5kΩ to 10kΩ.
