

## VEHICLE DATA RECORDER QUICK START CONECTION GUIDE

If you have **VDR®** device, you are required to use the gateway configuration to be able to Setup and mannage the device supplied to you.

The simplest solution to setup the system is conecting IP. sDue to the nature of VDR device ,it has to pass traffic on your network and setting your gateway in IP Passthrough mode will allow you to get all the same benefits of the Linksys Velop Intelligent Mesh Wi-Fi System while allowing U-verse to continue to manage your device

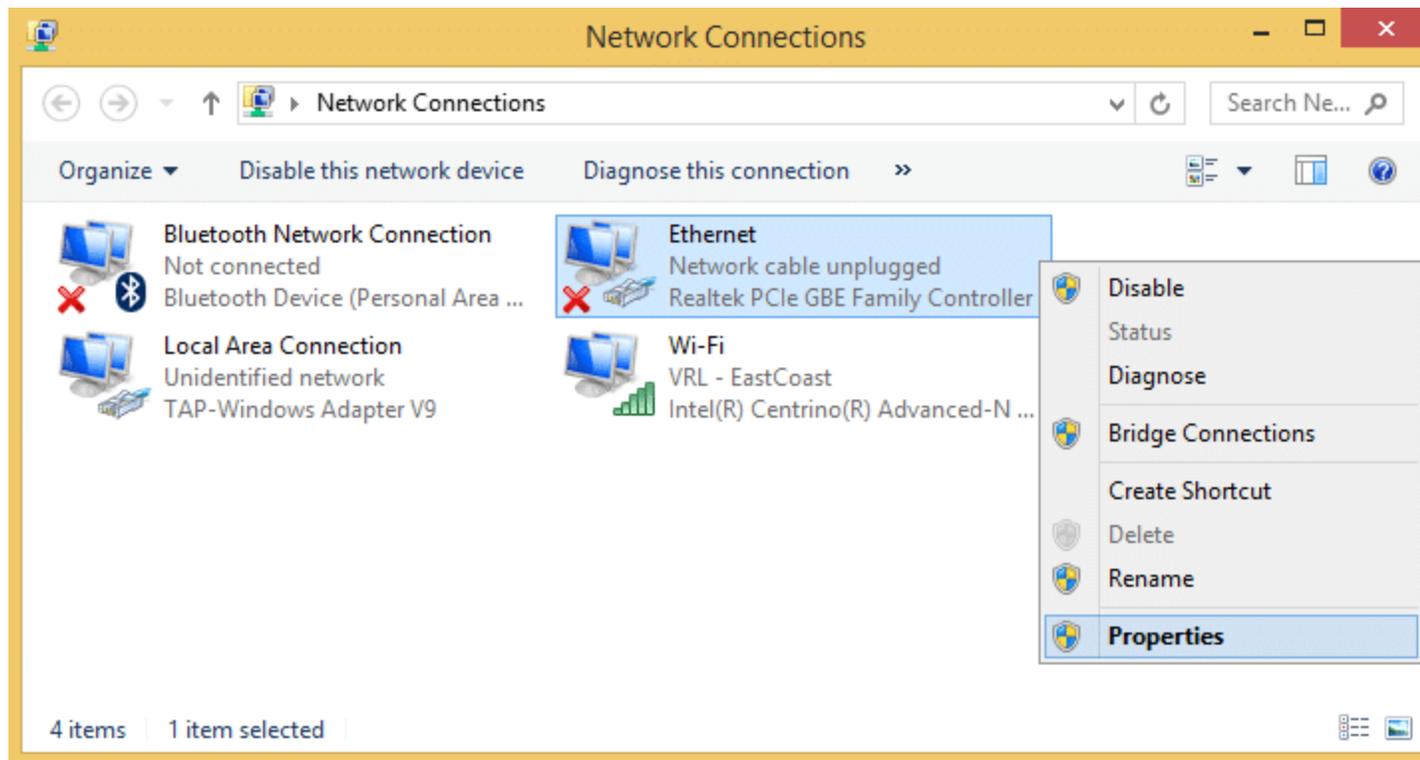

# Direct Ethernet Connection

### FIND YOUR ETHERNET ADAPTER'S IP ADDRESS

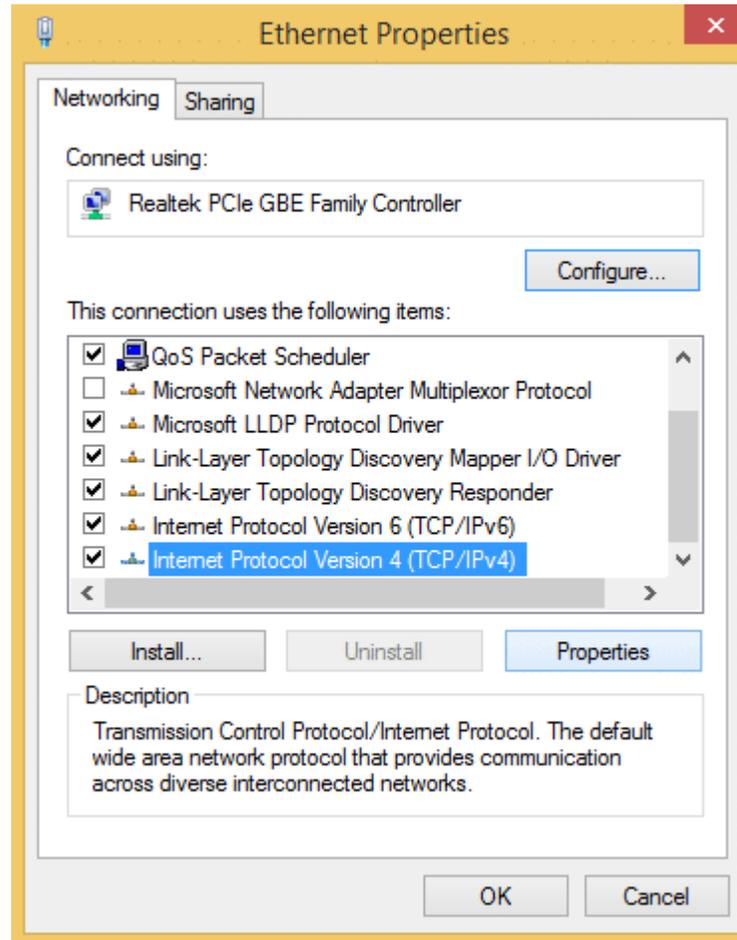

First, we need to find out the IP address of the ethernet adapter on the computer you will be accessing the Pi from.

Access the “Network Connections” window by right clicking on the Windows icon in the task bar (Windows 8), or through the Control Panel in earlier versions of Windows. Then right click on the Ethernet connection and select “Properties”:

## VEHICLE DATA RECORDER QUICK START CONECTION GUIDE

Scroll down the list and select “Internet Protocol Version 4 (TCP/IPv4)”, then click the “Properties” button:

## VEHICLE DATA RECORDER QUICK START CONECTION GUIDE

If “Use the following IP address” is selected, take note of the IP address. In this case it’s 192.168.0.62 for the device , but your’s must be different, you can choose one IP Adres From 192.168.0.0 to 192.168.0.61 :

General

You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.

Obtain an IP address automatically

Use the following IP address:

IP address: 192 . 168 . 0 . 60

Subnet mask: 255 . 255 . 255 . 0

Default gateway: . . . .

Obtain DNS server address automatically

Use the following DNS server addresses:

Preferred DNS server: . . . .

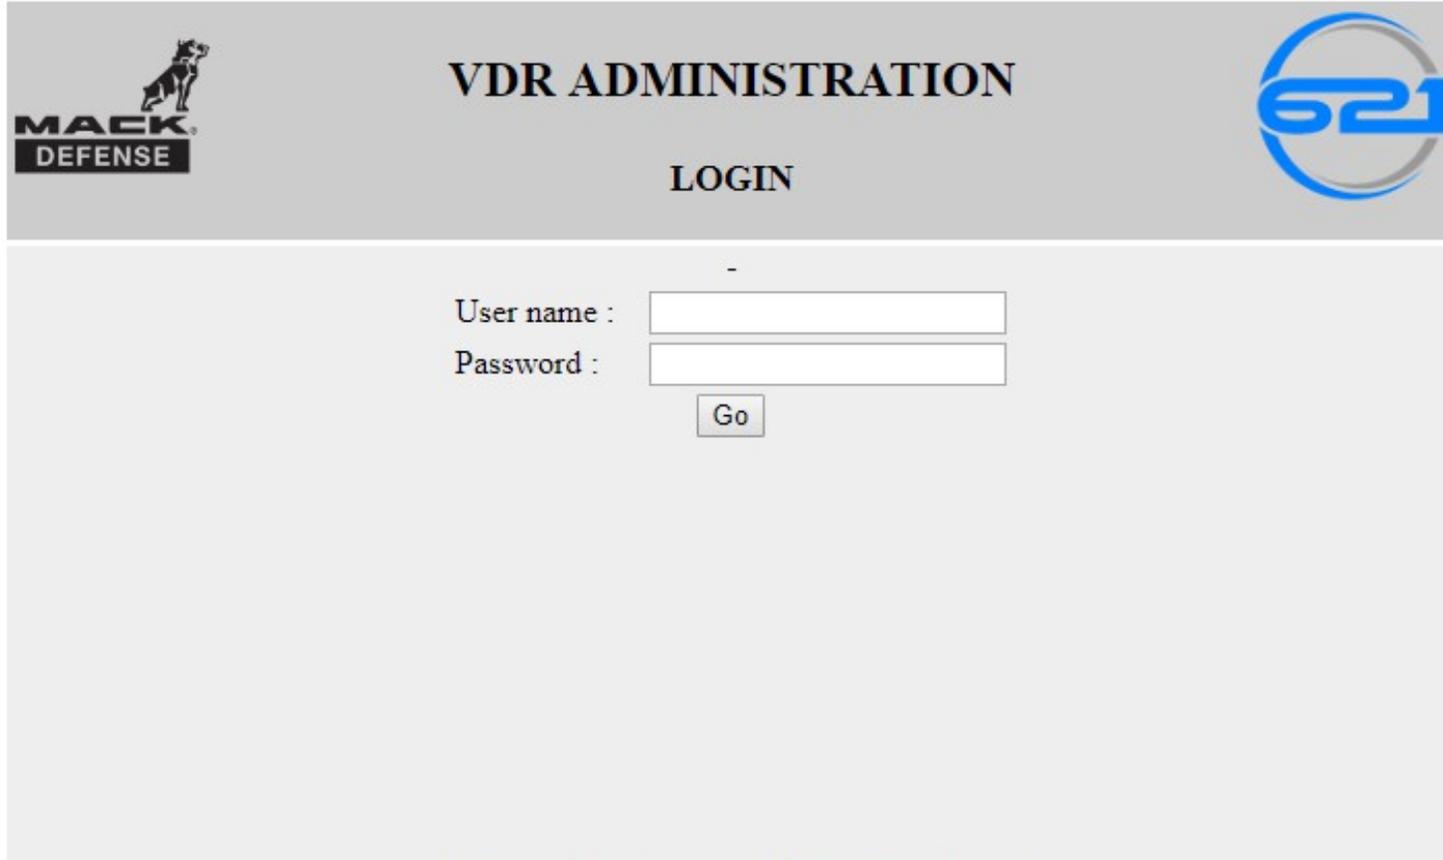

Alternative DNS server: . . . .

Validate settings upon exit

Advanced...

OK Cancel

Open a web browser and enter the IP address of your gateway (192.168.0.62). Log in to the web-based setup page using the default Username and Password: admin

# AVDR-J1A4-001 VEHICLE DATA RECORDER

## Description

The device is designed for mobile applications and features robust packing.

## Features

- Operating temperature -40 to +85°C.
- Protocols include Generic CAN, J1939 or CAN Open protocol..
- Military grade conformally coating plus SilGuard potting.
- Field proven Deutsch DT Series connectors.
- 

## Product Stage:

Part Number	<b>AVDR-J1A4-001 VDR</b>	
Accessories		

Length	0	
Height	0	
Depth	0	
Material	PL	
Operating Temperature	-40°C to 85°C	
Voltage (Power)	6.5 - 38 VDC	
Auxiliary Inputs:		
Threshold voltage	3.2 V+/-5%	
Input Resistance	20 KΩ	
Supported Encoders	Zettlex IncOder	Netzer SSI Encoder
Serial Format	SPI / SSI / ASI	SSI1 - SSI9 , SSI2&7 SSI6(CRC) - Recommended
Data Sampling	10 to 22 bits	(per revolution)
Protocols	CAN / J1939 / CANOpen	
Baud Rate	250 kbit/s
